

MUHAMMAD DAWOOD HAYAT

Business Data Analyst

daudhayat51@gmail.com | +92 329 512 9250 | Islamabad, Pakistan | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-oriented Business Data Analytics undergraduate (4th semester, COMSATS University Islamabad) with hands-on experience building data pipelines, SQL-driven ERP systems, and Python-based analytical dashboards across academic projects. Proficient in Python (Pandas, NumPy, Matplotlib), Oracle SQL, and Advanced MS Excel. Demonstrated ability to translate complex datasets into clear, decision-enabling business insights. Seeking a Business Data Analyst role where I can apply quantitative analysis and database management skills to drive measurable business outcomes.

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy, Matplotlib), SQL (Oracle SQL)
Databases	Oracle SQL, Relational Database Design, Database Management
Analytics	Data Cleaning, Data Transformation, Statistical Analysis, Financial Modeling
Visualization	Matplotlib, MS Excel (Advanced), Dashboard Design
Tools	MS Excel, Jupyter Notebook, Git / GitHub, MS PowerPoint
Concepts	ERP Systems, Business Intelligence, KPI Reporting, Quantitative Analysis

ACADEMIC & DATA PROJECTS

Python Statistical Data Engine | Academic Project

2024 – 2025

Business Data Analytics Program · COMSATS University Islamabad

- Processed and cleaned structured datasets of 10,000+ rows using Python (Pandas, NumPy), reducing data inconsistencies and preparing clean data for analysis.
- Developed 5+ Matplotlib dashboard visualizations to identify revenue trends, seasonal patterns, and correlation insights, translating raw data into presentation-ready business intelligence.
- Delivered statistical findings as structured business reports, enabling data-driven interpretation by non-technical stakeholders.

ERP System Architecture | Project Lead

2024 – 2025

Business Data Analytics Program · COMSATS University Islamabad

- Spearheaded a 4-member team to design and deploy "Stock Manager Enterprise," a browser-based retail ERP system covering inventory, sales, and reporting modules.
- Architected Oracle SQL database schema and implemented query logic to track inventory movement across 3 core operational modules, improving data retrieval efficiency.
- Unified backend database structure with frontend business workflows, enabling real-time inventory visibility and supporting end-to-end retail operations.

Financial Modeling & Business Analysis | Academic Project

2024

Business Finance Coursework · COMSATS University Islamabad

- Audited business workflows and operational data using core Business Finance frameworks to identify profitability gaps and workflow inefficiencies.
- Constructed structured financial models in Advanced MS Excel, applying formulas, pivot tables, and scenario analysis to model profitability outcomes and support strategic decision-making.

EDUCATION

Bachelor of Science in Business Data Analytics

Sep 2024 – Present

COMSATS University Islamabad — Currently in 4th Semester

- Relevant Coursework: Business Finance, Statistical Theory, HR Management, Database Management, Business Analytics
- Key Projects: Python Statistical Data Engine, ERP System Architecture, Financial Modeling (see Projects above)

FSc Pre-Engineering

Islamabad Career College (ICC)

2022 – 2024

Matriculation in Computer Science

Islamabad Career College (ICC)

2020 – 2022

CERTIFICATIONS & LEARNING

Microsoft Excel — Advanced Data Analysis | Self-Directed
Oracle SQL Fundamentals | Academic Certification
Python for Data Analysis (Pandas, NumPy, Matplotlib) | Project-Based Learning
